(54) Title: A METHOD FOR NETWORK SELECTION IN COMMUNICATION NETWORKS, RELATED NETWORK AND COMPUTER PROGRAM PRODUCT THEREFOR

(57) Abstract: At least one user (A, B, C) is given access to a respective home operator (HSPA, HSPB, HSPC) over a communication network such as an IP network via an access network (AN, ASP) and through any of a plurality of supported visited networks (VSP1, VSP2, VSP3). The user is communicated a list of the supported visited networks (VSP1, VSP2, VSP3) and is thus given the possibility of selecting one of the supported visited networks (VSP1, VSP2, VSP3) as the path for reaching the respective home operator (HSPA, HSPB, HSPC).
